

# **MIOSHA Bloodborne Pathogens (BBP) Training Test**

Passing Score: 80%

MULTIPLE CHOICE (20 Questions)

**1. Bloodborne pathogens are:**

- A. Viruses or bacteria carried in the blood
- B. Any organism found in the environment
- C. Only viruses transmitted by coughing
- D. Fungal infections

**2. The three most common BBPs of concern in healthcare are:**

- A. COVID-19, influenza, TB
- B. HIV, HBV, HCV
- C. Strep, MRSA, C. diff
- D. Dengue, Zika, Ebola

**3. MIOSHA requires a BBP training review:**

- A. Once, at hire
- B. Every 5 years
- C. Annually and when job tasks change
- D. Only after an exposure

**4. An Exposure Control Plan must be:**

- A. Stored off-site
- B. Reviewed and updated annually
- C. Written only if requested
- D. Optional in Michigan

**5. HBV vaccination must be offered:**

- A. After 90 days
- B. Only if asked
- C. Within 10 days of assignment to exposure-risk tasks
- D. At employee expense

**6. Engineering controls include:**

- A. Handwashing
- B. Sharps containers and safety needles
- C. PPE reuse
- D. Food storage

**7. Work practice controls include:**

- A. Changing how tasks are done to reduce exposure
- B. Installing new lights
- C. Replacing HVAC
- D. Never wearing gloves

**8. Which PPE is required for splash risk?**

- A. Regular eyeglasses
- B. No PPE needed
- C. Eye protection and gown
- D. Shoe covers only

**9. Handwashing must occur:**

- A. Only at lunch
- B. After removing gloves
- C. Once per day
- D. Only for surgical staff

**10. Contaminated sharps must be disposed of:**

- A. In regular trash
- B. In a labeled sharps container
- C. In cardboard boxes
- D. By a supervisor only

**11. Universal precautions means:**

- A. Treat all blood and certain fluids as infectious
- B. Only treat visible blood as infectious
- C. Assume all patients are healthy
- D. Use PPE only when convenient

**12. An exposure incident is:**

- A. A spill of coffee
- B. Blood splash into eyes or mucous membrane
- C. A patient fall
- D. A missed appointment

**13. After an exposure, first action:**

- A. Leave work
- B. Notify OSHA
- C. Wash exposed area immediately
- D. Ignore unless symptoms develop

**14. MIOSHA requires medical evaluation:**

- A. Only if symptoms appear
- B. Immediately after exposure
- C. After 30 days
- D. Only if requested

**15. Biohazard labels must be:**

- A. Red or orange-red with symbol
- B. White only
- C. Optional
- D. Only on sharps containers

**16. Regulated waste includes:**

- A. Lunch leftovers
- B. Office trash
- C. Blood-soaked materials
- D. Unused PPE

**17. Employees must receive training:**

- A. On paid time
- B. On unpaid time
- C. Only if hired after 2020
- D. Only full-time employees

**18. Which is NOT PPE?**

- A. Gloves
- B. Gown
- C. Face shield
- D. Prescription sunglasses

**19. Training records must be kept for:**

- A. 1 year
- B. 3 years
- C. 5 years
- D. 30 years

**20. Employees must report sharps injuries:**

- A. Only if bleeding
- B. Immediately to supervisor
- C. Weekly
- D. Never

**SHORT ANSWER**

**21.** Explain what “universal precautions” means.

**22.** List two engineering controls used in your workplace.

**23.** What steps must be taken immediately after an exposure?

**24.** Why is the HBV vaccine offered to employees?

**25.** What does the biohazard label indicate and where must it be used?
